SimpliLearn Phase 2 Project: FlyAway
Airline ticket booking portal
Submitted by: KAVIN K R

Date of submission : 25-10-2022
GitHub Project Repository URL : GitHub Link

<u>Sprints Planned:</u>
Sprint 1: Creation of hibernate entities, admin login and password changing features.
Sprint 2: Creation of full admin panel features for viewing and addition of master list of places, airlines and flights.
Sprint 3: Creation of searching for flight from home screen and adding passenger details feature.
Sprint 4: Creation of payment gateway and booking confirmation feature.
Sprint 5: Final publish with minor code tweaks.

Build Tool:
Maven webapp archetype has been used to create the project and various required dependencies(MySql connector, Hibernate core) are added in the pom.xml file.
Technologies used:
Java EE-Servlets, JSP, Hibernate and MySql technologies are used to create the backend scripts and business logic. HTML and JSP are used for displaying the content in the frontend.
